

★ Featured Project: Troy Buchanan High School (MO)

WE ARE TROY

Lincoln County R-III School District
John R. Lawrence Sports Complex
(Troy, MO)

"Working with ATG to provide turf fields for our students and community has been a game-changing experience. The upgrade of both fields provided safe and reliable playing, learning, and performance surfaces for a variety of activities and athletics. Elevating our fields has allowed our community to host and celebrate events at a district and regional level."

Dr. Mark S. Penny, Superintendent, Lincoln County (Troy) R-III School District

SPORTS RAMTURF
The Safest Turf on Earth

"We have had a great experience with ATG's turnkey service when upgrading sports fields and sports complexes. They provide quality workmanship to customized synthetic turf fields and they stand behind their work for high levels of customer satisfaction. We're extremely proud of our fields and the all weather opportunities they afford our students. Thank you ATG!"

Dr. Todd Culbertson, Assistant Superintendent

"When we made a decision in 2019 to move from our beautiful natural grass field to a synthetic surface, we knew we had to make a statement. This was not a decision we took lightly and we wanted to make sure we got it right. We were looking for a surface that had great playability, was safe for our athletes, and a product that would outlast the warranty. When we chose ATG, we hoped we were making the right decision. We are now in the 5th season of using the field and can say without a doubt that we did. ATG has since completed a baseball/softball renovation and they once again knocked it out of the park. The quality of the product and the customer service are just a couple things that stand out for me."

Jason Smith, Activities Director

"The facility is more amazing than I even imagined. Having this new amazing facility brings even more excitement for our girls to show up and work hard! I can't thank our community and school system in conjunction with ATG sports enough for bringing us the beautiful complex."

Lance Richardson, Head Softball Coach

"The field definitely played differently than other turf fields we have played on. We love the consistency of the playing surface. Balls don't bounce as high off the turf. I feel it was a cleaner, better quality of game at our place. At some other turf fields we have played on, ground balls are really fast and the field is a factor in the game. I feel that our field, more than anywhere else, the field itself improves the quality of play because the field is so nice it's not a factor in the outcome."

Justin Rodgers, Head Baseball Coach

"Our turf football field at TBHS is among the absolute best in the area in both quality and appearance. Our student athletes at TBHS are so incredibly fortunate to compete on great fields within our top notch athletic facility."

Brett Wiggers, Head Football Coach
